

Adam (Abdulaziz)

Jr. Full-Stack Developer

📍 Busan, South Korea ✉️ mashrabovabdulaziz2463@gmail.com

Experience

HeadHunters — Front-End Web Developer

📅 Jul 2023 - Nov 2023

React TypeScript HTML&CSS

- Developed reusable components and templates to streamline the development process.
- Implemented rich user experience by creating 30+ new features using semantic HTML&CSS
- Integrated third-party services and components like payment gateways, geo-location and social media.
- Optimized the performance of the website by implementing best practices such as code splitting and lazy loading.
- Experienced with building SPA, CRM, E-commerce platforms.

FoxMinded — Web Development Mentor (self-employed)

📅 Jan 2023 - Aug 2023

HTML CSS JavaScript

- Helped students understand best practices in frontend development, including HTML, CSS, and JavaScript standards.
- Prepared illustrations, materials, tasks and docs for easy learning.

Featured Project

ApexMall — MERN eCommerce Website

📅 Mar 2023 - May 2023

React Bootstrap Redux Express MongoDB PayPal

✦ This project contains:

- Full featured shopping cart with PayPal & credit/debit payments
- Admin area to manage customers, products & orders
- Product rating & review system
- Product search, carousel, pagination & more

Other projects

- Diabetes - web app where you can check if you have diabetes or not using machine learning model (Django + React)
 - Math Expert - Tracks the progress of solving the collection of math problems thematically sorted. (React)
 - Portfolio I - Portfolio website inspired by Brittany Chiang's. (React)
 - VS Code File System - Test project: Built file system using recursive method. (React)
 - Volume Control - Volume control with hand gesture recognition. (Python, cv2)
 - Minesweeper - Simulation of the game using 2000s design. (React, ts)
 - WebTech - (Ongoing) Landing Page (React, scss)
- ([iamalaziz](#) - visit my personal blog website to see more projects)

Education

Dongseo University — Computer Engineering

📅 Sep 2020 - Jun 2024

GPA - 3.9/4.5

✦ **Experienced Fields**

Calculus	Artificial Intelligence
Linear Algebra	Machine Learning
Advanced Programming (C)	Cloud Computing
Data Structures	Digital Logic
Operating System (Linux)	OOP with Python
Database	Computer Network
Web Programming	Web Server Programming
Software Project & Design	Mobile and Sensor Computing
Mobile Programming (Java)	

*Although I am expected to graduate in June, I can work full-time because I have only Final Project left for this semester.
